

GUARANTEE

(same as a new tub)

Your new finish has a guarantee for a period of one year from date of completion.

This guarantee covers peeling, sagging, crazing and flaking. Sorry, but we can not guarantee against rust and man-made damage such as scratching or chipping. However, should non-guaranteed damage occur, it can be repaired for a nominal fee.

Failure to comply with "Care and Cleaning" instructions may void this guarantee.

Color : _____ Resurface : _____

Resurfacing Estimate :\$ _____ *

Notes :

Estimated Total : \$ _____ *

* price valid for 30 days.

Payment in full is requested the day of completion.

Tub & Tile Resurfacing

WHAT WE DO

TUBS :

All possible care is taken to protect your home. The appropriate hardware is removed from your tub, existing caulking is removed and the preparation begins. The surfaces to be refinished are chemically cleaned and then etched with a mild acid. All chips, cracks and related repairs are completed*. The surface is sanded and then made as dust free as possible. Unlike many other companies, we mask the entire room prior to the spray process for maximum protection.

The first material applied is an acid based adhesive coat. This is the perfect bonding agent for the glaze finish, the finest synthetic porcelain product available today.

The color you select is then catalyzed and applied.

The most commonly asked question is “how many coats are used?”. The number of coats is not that important, the quality of material and the preparation before it’s applied is essential. For the average tub we use approximately 3/4 quart of material, producing an extremely hard, shiny, durable and long lasting finish with a realistic life expectancy of 8 to 12 years.

When the process is complete and the acrylic urethane has “skin cured” the room is unmasked and the tub is recaulked. The entire process takes on average 3 to 5 hours for a tub. The resurfaced area must cure for an average of 24 hours prior to use.

* unless discussed

THE ONLY WAY YOU KNOW WE WERE THERE IS THAT YOUR REFINISHED SURFACE WILL LOOK AS NEW AS TECHNOLOGICALLY POSSIBLE.

WHAT YOU DO

BEFORE WE ARRIVE :

- Make sure bathroom is empty. Anything that is **not** permanent **or** in a cabinet **must** be removed from the room.
- Faucets **must** be drip free; all leaks repaired; **all** plumbing completed.
- Bathroom should be cleaned; the cleaner the room, the cleaner the job.

AFTER WE LEAVE :

- **Do Not touch** for 24 hours.
- Clean and maintain new finish as per instructions.
- **ENJOY YOUR NEW FINISH !!!**

CARE AND CLEANING : (same as a new tub)

DO :

- **Do** use Scrub-Free®, Lysol Tub & Tile®, Comet **Non**-abrasive Bathroom Cleaner®; any liquid or aerosol.
- **Do** use a nylon “Dobie Pad”® type scrubber, if needed.
- **Do** keep faucets tight & maintained, free of drips or leaks.
- **Do** dry tub after each day of use.
- **Do** use a bath mat or slip protection.

DO NOT :

- Do **not** use Soft Scrub® or any abrasive cleansers.
- Do **not** leave soap, bottles or wet cloths standing on your new surface.
- Do **not** use **suction cup** type bath mats.
- Do **not** leave bath mat in tub after use.

WHAT ELSE ?

TILE :

Basically the same process that applies to tubs applies to wall tile. However, normally the process takes an additional day of preparation and an additional day of “set-up”. Day one consists of “prepping” and regrouting. Day two is curing time, needed to allow for proper drying of the grout. (*Some other companies claim they can do this process in one day. However, the moisture in the grout, if not allowed proper cure time, can cause a “weak spot” in the bonding process resulting in adhesion failure.*) Day three is product application in the color you select, and we clean up the room. The next 24 hours is cure time.

Regarding wall tile, please keep in mind that as a general rule, wall paper and painted surfaces cannot be salvaged. For optimum results, vanity, sink, commode and other fixtures should be removed from the room.

AND WE CAN ALSO DO...

- Regrouting
- New Tile Installations
- New Tile **Over** Tile Installations
- Epoxy Seamless Flooring
- Tub Capping Tile (at caulk line)
- Installation of Shower Doors and Grab Bars
